SpecialtyCare® is the nation’s largest patient-centric provider of intraoperative neuromonitoring services, supporting nearly 100,000 cases and 2,300 surgeons every year. Our 500+ surgical neurophysiologists work alongside the world’s leading surgeons to identify early signs of evolving neural injury. They’re backed by our team of IONM physicians who provide additional support with real-time monitoring, enabling prompt interventions that help avoid and resolve neural deficit and the associated costs of long-term, chronic care.

Our IONM customers achieve the highest quality care outcomes, avoid patient injuries, and reduce related costs as a result of our unbiased patient-centric focus, data-driven research, and commitment to ongoing education, advanced certifications, and regulatory compliance.

By collecting and analyzing more clinical data than anyone else, our reports and analysis provide unique insights on medical and economic outcomes, industry benchmarks, and peer-to-peer comparisons that drive continuous improvement.

Our partnership increases value by driving exceptional patient care, efficiency, and financial outcomes.
SAFER SURGERY. LOCAL CARE. SATISFIED SURGEONS.
Faces you know. Neurophysiologists you trust. SpecialtyCare’s IONM professionals live in your community and provide localized care as fully integrated members of your team. With more than 25 years of experience and our national scale, we eliminate the chronic challenge of hiring, training, retaining, and scheduling. Our trusted, market-leading experts are available at all times to reduce surgical risk, improve surgeon satisfaction, and drive patient safety and outcomes.

PUTTING PATIENTS FIRST
We focus on providing the most skilled and reliable IONM resources available so that patients get the best care and surgeons are highly satisfied. Unlike others, we don’t sell equipment and technology and then provide IONM as an add-on service. By understanding the needs of each surgeon and the OR team, we are closely aligned and provide the safest, highest quality outcome for every patient. Further, our in-house outreach program attempts to work directly with patients’ insurance companies to get favorable in-network treatment (even if we are currently out-of-network with a particular payer). This extra effort helps eliminate some patient frustration with other out-of-network providers, which has led to the “surprise bill” legislation in several states.

PROVIDING THE CERTAINTY OF CLINICAL EXPERTS
Along with the most experienced group of physicians providing over-reading services on all IONM cases, our Intraoperative Neuromonitoring, Deep Brain Stimulation, and Transcranial Doppler experts represent the largest group of certified, advanced-degreed, and PhD-level professionals in the industry. SpecialtyCare is one of only two IONM training programs in the U.S., and the sole services provider, to be recognized by ABRET. This distinction further demonstrates our ability to provide skilled clinicians who offer unmatched support in the OR. Clinical privileges are reviewed annually and must meet stringent performance criteria and competencies.

SCOPE — IMPROVING PERFORMANCE & VALUE
To measure performance and drive continuous improvement in value-based care, we offer SCOPE, the SpecialtyCare Operative Procedural Registry®, which grows with case data from nearly 100,000 IONM procedures annually. With access to metrics from this multi-institutional database—which is the largest of its kind—customers benefit from industry benchmarking and peer-to-peer comparisons that no hospital or system can match. We provide two tiers of quality reporting: performance directly or significantly impacted by SpecialtyCare experts, and performance of the surgical team as a whole compared to internal, regional, and nationwide measures. SCOPE also fuels our award-winning research, which defines care quality standards and improves patient and financial outcomes that result in higher value for our customers and patients.

MITIGATING LEGAL, FINANCIAL & REPUTATION RISK
We help protect our customers from healthcare fraud and unethical business practices by maintaining a comprehensive and robust compliance program that meets all regulatory standards. For example, we have no physician owners in a position to violate Stark Law. Every element of our service—from quality to compliance—safeguards our customers and our patients.

HIGHLY SATISFIED CUSTOMERS
- 98 out of 100 customers agree that our services are worth the price
- 9 out of 10 report their surgeons are satisfied with SpecialtyCare
- 9 out of 10 praise our clinical competency and consistency
- 9 out of 10 say we are integral to their team and positively contribute to the quality of care

With ongoing education through SpecialtyCare University, we develop expertise beyond required industry certifications so that your surgical team can be certain they have the best partner for clinical excellence, always.
